- ✓ Tag: Basic White – 3 ¼" W x 3 ¼" H
- ✓ Poinsettia Element: Fussy cut from Boughs of Holly DSP
- ✓ Ribbon:
 - Gold & Vanilla – 5" length
 - Real Red – 5" length

INSTRUCTIONS

1. Using your paper trimmer, cut the card base and layers to size. Score the card base for a side fold card.
2. Fold card base and use the Bone Folder tool to burnish a crisp edge on the fold. (HINT: I burnish the back. The bone folder tends to make the burnished edge 'shiny' and I don't want that shiny edge showing on the front of my card.)

3. Using your Twinkling Lights Dies, die cut the tree dies cuts. Use the tree outline to cut the Gold Glimmer paper. Use the tree detailed die to cut the tree front from the Lights Aglow DSP paper.
4. Using your Twinkling Lights Dies, use the small die that cuts a North Star and use it to die cut a North Star from the Gold Glimmer paper.
5. Using your Witch Hat Builder Punch, punch out a few stars from your Gold Glimmer paper.
6. Using your Window Dies, die cut the window from the center of the Cherry Cobbler Festive Foils DSP. NOTE: Before cutting, make sure you know how high up you want the window opening over your tree.

7. Using your Stylish Shapes Dies, use the largest square to cut the edges on your Basic White Tag. Because your finished tag size is not square, you will first cut a square. After that is done, set your tag down again and move your die up so it isn't cutting the top edge. Set it so that it cuts your tag to size.
8. Using the sentiment stamp of your choice and the Versamark Clear Ink, stamp your sentiment on your tag. Cover the tag with Gold Embossing Powder, shaking off the extra powder. Use your Heat Tool to heat the embossing powder on the tag.
9. Using your paper snips, fussy cut a poinsettia from your Boughs of Holly DSP.
10. Using your Wink of Stella, color your poinsettia so it has a shimmery look.
11. Adhere the poinsettia to the upper right corner of your sentiment tag.
12. Using your Stampin' Seal on the back of your tag, lay your ribbon pieces across the back in the order you want. Trim the ends of the ribbon at an angle.
13. Using your liquid glue, adhere the gold glimmer tree to the back of your Lights Aglow die cut tree. This will make the gold show through the holes on the Lights Aglow die cut.
14. Using your Stampin' Seal adhesive, adhere the tree to the Festive Foils Soft Succulent layer.
15. Using your Dimensional Sheets or Stampin' Dimensionals, adhere the Festive Foils Cherry Cobbler layer on top of the Soft Succulent layer, so the Cherry Cobbler layer is raised.
16. Cut pieces of the Dimensional Sheets to fit the back of your card front or use multiple Stampin' Dimensionals and adhere the card front to the front of your card base.
17. Cut a piece of the Dimensional Sheets to fit the back of the tag and adhere to the tag. Adhere the tag to the bottom front of the card.
18. Using your liquid glue, adhere the North Star to the top of tree.
19. Adhere Festive Pearls of your choice to the tree.
20. Adhere some of the gold glimmer stars to the card front.
